

JOINT CUTTERS

Joint Cutter CF-2116 D

Application

- it is especially suitable for cutting jobs in narrow building sites or areas difficult to access due to its compact construction and easy manoeuvrability
- hinged blade guard for cuts right to wall and edges

Features

- height-adjustable handles
- large water container
- hydrostatic travel drive
- adjustable cutting depth indicator
- electro-hydraulic lifting of saw blade
- ring eye for transporting
- mounting of saw blade possible on the right or left side

technical data	CF-2116 D
cutting depth	200 - 300 mm
blade-Ø	600 - 800 mm
bore hole of saw blade	25,4 mm
blade mounting	right or left
max. mounting width	20 mm
motor output (net)	14,7 kW
motor type	Hatz 2G40 (diesel)
motor starter	electric
cutting depth adjustment	electro-hydraulic
feed	hydrostatic
contents water container	35 l
water pump	electric
dimensions L/W/H	1300/1000/1150 mm
weight	340 kg

Green concrete conversion kit for CF-2116 D

- cutting depth with green concrete conversion kit 100 mm
- blade-Ø with green concrete conversion kit 400 mm
