# 73230 KENSINGTON HOODED LIFALOFT JACKET

LifaLoft™ is an insulation revolution that will keep you warmer with less weight and bulk due to the unique Lifa® yarn technology. Developed in cooperation with PrimaLoft®, LifaLoft™ is a combination of Lifa® and PrimaLoft®'s extensive knowledge in synthetic insulation. LifaLoft™ insulation is based on a yarn technology that traps more air vs polyester at a lighter weight.

The fiber doesn't absorb water and has inherent water repellency without the need for treatment due to the hydrophobic properties of the Lifa® fibers, which makes this insulation technology ideal for all year round adventures in any condition and keeps you warm even when wet. Less carbon and water footprint vs comparable polyester for a lower environmental impact.
